South Dakota Journal of Medicine

This work explores the increasingly popular phenomenon of volunteer tourism in the Global South, paying particular attention to the governmental rationalities and socio-economic conditions that valorise it as a noble and necessary cultural practice. Combining theoretical research with primary data gathered during volunteering programs in Guatemala and Ghana, the author argues that although volunteer tourism may not trigger social change, provide meaningful encounters with difference, or offer professional expertise, as the brochure discourse and the scholarly literature on tourism and hospitality often promises, the formula remains a useful strategy for producing the subjects and social relations neoliberalism requires. Vrasti suggests that the value of volunteer tourism should not be assessed in terms of the goods and services it delivers to the global poor, but in terms of how well the practice disseminates entrepreneurial styles of feeling and action. Analysing the key effects of volunteer tourism, it is demonstrated that far from being a selfless and history-less rescue act, volunteer tourism is in fact a strategy of power that extends economic rationality, particularly its emphasis on entrepreneurship and competition, to the realm of political subjectivity. Volunteer Tourism in the Global South provides a unique and innovative analysis of the relationship between the political and personal dimensions of volunteer tourism and will be of great interest to scholars and students of international relations, cultural geography, tourism, and development studies.

A Letter to the First Belfast Company of Volunteers

Denmark and Switzerland are small and successful countries with exceptionally content populations. However, they have very different political institutions and economic models. They have followed the general tendency in the West toward economic convergence, but both countries have managed to stay on top. They both have a strong liberal tradition, but otherwise their economic strategies are a welfare state model for Denmark and a safe haven model for Switzerland. The Danish welfare state is tax-based, while the expenditures for social welfare are insurance-based in Switzerland. The political institutions are a multiparty unicameral system in Denmark, and a permanent coalition system with many referenda and strong local government in Switzerland. Both approaches have managed to ensure smoothly working political power-sharing and economic systems that allocate resources in a fairly efficient way. To date, they have also managed to adapt the economies to changes in the external environment with a combination of stability and flexibility.

Greenfield. As the driving force behind every not-for-profit, fund raising is a key to an organization's success in fulfilling its mission. However, while it's important to develop the skills needed to raise money, it's equally important to know how to allocate it properly in order to meet your goals. Beginning with an examination of philanthropic history and perspective, it goes on to describe the individual elements of the development process, as well as the organizational requirements needed for the process to work. With detail and clarity, Greenfield covers such essential bases as the evaluation of program effectiveness, policies and procedures for public solicitation, the fund raising environmental audit, matching gift programs, donor recognition, special projects campaigns, and much more. Threaded throughout the book is the theme of "friendraising and relationship building," both vital components of increasing capability and capacity to address the needs of today, with an eye toward those of tomorrow. Along with an added, in-depth discussion of ethics, the Second Edition introduces new best practices that have developed over the past few years, and features updated data, useful worksheets, such as economic statistics, demographics, and reports from the American Association of Fund-Raising Council. Religion is considered a key predictor of volunteering: the more religious people are, the more likely they are to volunteer. This positive association enjoys significant support in current research; in fact, it could be considered the 'default perspective' on the relationship between both phenomena. In this book, the authors claim that, although the dominant approach is legitimate and essential, it nonetheless falls short in grasping the full complexity of the interaction between religion and volunteering. It needs to be recognized that there are tensions between religion and volunteering, and that these tensions are intensifying as a result of the changing meaning and role of religion in society. Therefore, the central aim and contribution of this book is to demonstrate that the relationship between religion and volunteering is not univocal but differentiated, ambiguous and sometimes provocative. By introducing the reader to a much wider landscape of perspectives, this volume offers a richer, more complex and variable understanding. Apart from the established positive causality, the authors examine tensions between religion and volunteering from the perspective of religious obligation, religious change, processes of secularization and notions of post-secularity. They further explore how actions that are considered altruistic, politically neutral and motivated by religious beliefs can be used for political reasons. This volume opens up the field to new perspectives on religious actors and on how religion and volunteering are enacted outside Western liberal and Christian societies. It emphasizes interdisciplinary perspectives, including theology, philosophy, sociology, political science, anthropology and architecture.
